

List task

Level 1: Basics

Q1. Sum of List

Find the sum of all numbers in a list.

`Input: [1, 2, 3, 4, 5]`

`Output: 15`

Q2. Largest Element

Find the largest number in the list.

`Input: [3, 9, 2, 7, 5]`

`Output: 9`

Q3. Count Even and Odd

Count how many even and odd numbers are in the list.

`Input: [1, 2, 3, 4, 5, 6]`

`Output: Even = 3, Odd = 3`

Q4. Reverse List

Reverse the given list without using built-in reverse.

`Input: [10, 20, 30, 40]`

`Output: [40, 30, 20, 10]`

Q5. Average of List

Find the average of all elements.

`Input: [4, 8, 6, 2]`

`Output: 5.0`

Level 2: Logic

Q6. Remove Duplicates

Remove duplicate elements and keep only first occurrence.

`Input: [1, 2, 2, 3, 4, 4, 5]`

`Output: [1, 2, 3, 4, 5]`

Q7. Second Largest

Find the second largest number in the list.

`Input: [5, 1, 8, 9, 2]`

`Output: 8`

Q8. Palindrome List

Check if the list reads same forward and backward.

`Input: [1, 2, 3, 2, 1]`

`Output: True`

`Input: [1, 2, 3, 4]`

`Output: False`

Q9. Move Zeros to End

Move all 0s to the end of the list.

`Input: [0, 1, 0, 3, 12]`

`Output: [1, 3, 12, 0, 0]`

Q10. Find Missing Number

List contains numbers from 1 to n with one missing. Find it.

`Input: [1, 2, 3, 5], n = 5`

`Output: 4`

Level 3: Interview Style

Q11. Pair Sum

Find all pairs in list whose sum equals target.

`Input: [1, 2, 3, 4, 5], target = 6`

`Output: [[1, 5], [2, 4]]`

Q12. Rotate List

Rotate the list to the right by k steps.

`Input: [1, 2, 3, 4, 5], k = 2`

`Output: [4, 5, 1, 2, 3]`

Q13. Common Elements

Find common elements between two lists.

`Input: [1, 2, 3, 4], [3, 4, 5, 6]`

`Output: [3, 4]`

Q14. Frequency Count

Count frequency of each element in the list.

`Input: [1, 2, 2, 3, 3, 3]`

`Output: {1: 1, 2: 2, 3: 3}`

Q15. Split Even Odd

Separate the list into two lists: even and odd.

`Input: [1, 2, 3, 4, 5, 6]`

`Output: Even = [2, 4, 6], Odd = [1, 3, 5]`

Level 4: Challenge

Q16. Bubble Sort

Sort the list in ascending order.

`Input: [5, 2, 9, 1, 5, 6]`

`Output: [1, 2, 5, 5, 6, 9]`

Q17. Max and Min in one pass

Find both maximum and minimum element.

`Input: [7, 3, 9, 2, 6]`

`Output: Min = 2, Max = 9`

Q18. Replace with Square

Replace each element with its square.

`Input: [1, 2, 3, 4]`

`Output: [1, 4, 9, 16]`

Q19. List is Sorted or Not

Check if list is in ascending order.

`Input: [1, 2, 3, 4, 5]`

`Output: True`

`Input: [1, 3, 2, 4]`

`Output: False`

Q20. Remove all Negative Numbers

Create new list with only positive numbers.

`Input: [1, -2, 3, -4, 5]`

`Output: [1, 3, 5]`
