

## String task

### \*Level 1: Basics\*

#### \*Q1. Length of String\*

Find the length of the given string.

`Input: "hello"`

`Output: 5`

#### \*Q2. Reverse String\*

Reverse the given string.

`Input: "python"`

`Output: "nohtyp"`

#### \*Q3. Count Vowels\*

Count number of vowels a, e, i, o, u in the string.

`Input: "education"`

`Output: 5`

#### \*Q4. Palindrome String\*

Check if string is palindrome.

`Input: "madam"`

`Output: True`

`Input: "hello"`

`Output: False`

**\*Q5. Count Uppercase and Lowercase\***

Count uppercase and lowercase letters.

`Input: "PyThOn"`

`Output: Upper = 3, Lower = 3`

**\*Level 2: Logic\***

**\*Q6. Remove Spaces\***

Remove all spaces from the string.

`Input: "hello world"`

`Output: "helloworld"`

**\*Q7. Count Words\***

Count number of words in a sentence.

`Input: "I love python programming"`

`Output: 4`

**\*Q8. Character Frequency\***

Find frequency of each character.

`Input: "banana"`

`Output: {'b': 1, 'a': 3, 'n': 2}`

**\*Q9. Replace Vowels\***

Replace all vowels with `\_`.

`Input: "hello"`

`Output: "h\_l|\*"`

**\*Q10. First and Last Character\***

Print first and last character of string.

`Input: "python"`

`Output: p n`

**\*Level 3: Interview Style\***

**\*Q11. Anagram Check\***

Check if two strings are anagrams.

`Input: "listen", "silent"`

`Output: True`

`Input: "hello", "world"`

`Output: False`

**\*Q12. Remove Duplicates\***

Remove duplicate characters keeping first occurrence.

`Input: "programming"`

`Output: "progamin"`

**\*Q13. Capitalize First Letter of Each Word\***

`Input: "hello world"`

`Output: "Hello World"`

**\*Q14. Find Longest Word\***

Find the longest word in a sentence.

`Input: "I love programming in python"``

`Output: "programming"``

**\*Q15. Check if String has Only Digits\***

`Input: "12345"``

`Output: True`

`Input: "12a45"``

`Output: False`

**\*Level 4: Challenge\***

**\*Q16. Count Substring Occurrences\***

Count how many times substring appears.

`Input: "ababab", sub = "ab"``

`Output: 3`

**\*Q17. Swap Case\***

Convert uppercase to lowercase and vice versa.

`Input: "PyThOn"``

`Output: "pYtHoN"``

**\*Q18. Remove Vowels\***

Remove all vowels from string.

`Input: "education"``

`Output: "dctn"``

**\*Q19. Check Pangram\***

Check if string contains all 26 alphabets.

`Input: "the quick brown fox jumps over the lazy dog"`

`Output: True`

**\*Q20. Reverse Each Word\***

Reverse each word but keep word order same.

`Input: "hello world"`

`Output: "olleh dlrow"`
